

Tien Nguyen

AI Product Manager and Product Owner

Ho Chi Minh City · tiennguyenthao@gmail.com · linkedin.com/in/tiennguyenthithao · portfolio-tienntt.vercel.app

Summary

AI product manager who leads R&D for agentic operations platforms. Agents draft the first pass; I check each claim against a source, score output against known facts, and sign off before release.

Experience

Green SM (Vingroup) — R&D Lead, Agentic Ops Platforms

Ho Chi Minh City · 2025–Present

- Lead the R&D team that designs and builds agentic operations platforms. Employer product names and internal architecture stay confidential.

Colonial Surety — Product Management Engineer

B2B fintech, insurance, payments · 2024–2025

- Ran a PM workflow with agents: graded transcripts, linked specs to sources, and blocked changes that lacked sign-off.
- Led an emergency PCI payment cutover from Transax to CardPointe across three live platforms.
- Designed seven insurance products in one flow, including knockout rules, shared claims, and partial-failure cases. Wrote the B2B SSO brief for two user types and partner sessions.

Hoookie JSC — Product Owner

Web3 and fintech · 2023–2025

- Wrote requirements for Keeta, a US payments network targeting 400 ms settlement: use cases, data flows, and acceptance checks.
- Built Sire.bot. A two-month backtest returned 137%. Scored model output against known results before release.

Olmo Technology — Product Owner

Social e-commerce · 2022–2023

- Raised bookings 30% by fixing the mobile booking path and bank-transfer flow. Shipped livestream commerce with chat, marketplace, and gifting.

4/10 Fire Protection Trading Service — Front-end Developer, then BA and Associate PM

ERP · 2019–2022

- Built ERP modules from code through rollout. Owned resource management and quality control.

Projects

Gelato. Framework that connects agent tools for company operations: orchestration, gates, and decision logs. In progress.

Knowledge Engine. Turns meeting notes into a wiki with sources; flags conflicts; grades specs; requires human sign-off before engineering starts.

Recon. Daily research sweeps that score each source for relevance, credibility, and predictive weight.

Sport Quant. Betting terminal with hard risk caps. Models advise; code decides the size.

Skills

Discovery: workshops, scope, stakeholders, competitor research

Delivery: pilots, integrations, production rollout, Scrum

Requirements: BRD, SRS, PRD, stories, acceptance checks

AI controls: source links, eval thresholds, human sign-off

Operations: agent workflows, MCP, APIs, model choice

Education

Anthropic Claude Code and Agent Skills — 2026

Product School AI Product Certification — 2025

CoderSchool Full Stack Developer — 2019
