

Tien Nguyen

AI-NATIVE PRODUCT MANAGER / PRODUCT OWNER

tiennguyenthao@gmail.com | 0963 351 586 | linkedin.com/in/tiennguyenthithao | tiennguyentt.github.io | github.com/tiennguyentt | Ho Chi Minh City

Not AI-assisted, agent-operated. I built a **multi-model agent system** (Claude and Codex, model-agnostic) that operates my product work, from research and discovery to graded, source-traced specs it can build from without follow-up questions. As an **ex-full-stack engineer**, I own the product calls, read the diff, and sign off on every change. **5+ years** across B2B fintech, payments, insurance, e-commerce, and ERP, from 0-to-1 to enterprise.

Fiserv PCI passed across 3 platforms | **7 insurance products** bundled | **400ms** cross-chain settlements | **137%** backtest ROI | **+30%** bookings

EXPERIENCE

Colonial Surety Feb 2026 to present

Product Management Engineer · B2B fintech, insurance, payments

- + **Fiserv PCI passed.** Drove an emergency Transax to CardPointe gateway migration across 3 production platforms on a hard deadline after the primary gateway shut down.
- + **7 insurance products.** Designed the multi-product bundling flow: knockout logic, unified claims, dynamic naming, an edit-policy matrix (upgrade, cancel, endorsement), and partial-failure edge cases.
- + **B2B SSO provider.** Turned ambiguous CTO direction into a structured BRD defining Colonial as an SSO provider for partners: 2 user types, adaptive registration, cross-partner sessions, redirect-back.

Hooookie JSC Jun 2023 to Dec 2025

Product Owner · Web3, fintech (outsource)

- + **400ms cross-chain settlements.** Led a non-custodial cross-chain wallet for a US client, with KYC/AML and fiat-to-crypto bridging.
- + **137% ROI in backtests (\$10K to \$23.7K in ~2 months).** Ran roadmap, backlog, and Scrum for an autonomous on-chain prediction-market fund.
- + **Shipped aVault and aLink.** Automated USDC strategies, a token-gated terminal for mispricing alerts, and a Telegram trading toolkit.

Olmo Technology Apr 2022 to May 2023

Product Owner · social e-commerce, web and app

- + **12-person scrum team.** Launched a livestream app in 6 months and an e-commerce platform (booking plus vouchers) in 4.
- + **30% increase in bookings.** Reworked the mobile booking flow and cut the bank-transfer payment task time inside a week.
- + **Shipped livestream gifting and live-booking.** As Junior PO: competitor research, personas, backlog and stories, delivering sprint items 20% faster.

4/10 Fire Protection Trading Service Jul 2019 to Jan 2022

Front-end Developer, then BA and Associate PM · ERP

- + **Started in code.** Built the front-end for the ERP modules for 6 months, the hands-on engineering base behind my full-stack background, before moving into BA and PM.
- + **Owned resource-management and quality-control ERP modules,** focused on integration and operational efficiency.

AI-NATIVE BUILDING

Knowledge Engine — [live demo](#) · [GitHub](#). A multi-model agent system (Claude and Codex, model-agnostic) on the Karpathy LLM Knowledge Base pattern: transcripts compile into a source-traced wiki, conflicts resolve by truth hierarchy, and specs are graded before engineering, with my sign-off.

Recon — [live demo](#). An autonomous AI research and news intelligence pipeline: daily reports, project audits, and signal predictions, run by Claude Code agents and delivered to a dashboard and Telegram. Its own scoring engine grades signals and tracks prediction accuracy.

sport-quant — [live demo](#) · [GitHub](#). A governed +EV prediction-market terminal: Elo and Dixon-Coles scoring, fractional Kelly sizing, and a deterministic risk gate that owns the bet decision while the LLM only explains the edge: the code decides, not the prompt. Streamlit, OpenRouter.

Petmood. AI pet-health triage for Vietnam: a photo plus symptoms returns a triage level and nearby vet options. Flutter, Supabase, Vision + LLM. Beta in HCMC.

AnDigi. An agent-operated insurance app for Vietnam where LLM agents run the workflow from quote to AI-assisted claims. Benchmarked on China's Ping An ecosystem. In design.

AI agent operations for SMEs. Moving a fashion-retail SME to an agent-operated model department by department: marketing and content, customer service, operations and inventory, and back office. Advisory, toward 2027.

EXPERT PM SKILLS

AI-native PM operations: orchestrating an agent system that drafts and grades specs, designing agent skills and subagents for PM work, human sign-off on every diff, AI agent operations for SMEs

Spec quality and provenance: spec grading for clarity and completeness, source provenance and traceability, conflict resolution by truth hierarchy, pre-handoff health checks

Discovery and framing: problem and opportunity framing, hypothesis and assumption testing, scoping ambiguous direction into a defined problem

Requirements: PRD, BRD, SRS, use-case and user-story modeling, acceptance criteria, edge-case and failure-path design

Roadmapping and delivery: prioritization and tradeoff calls, backlog ownership, Scrum delivery, analytics-informed decisions

Alignment and leadership: stakeholder and executive alignment, translating ad-hoc CTO direction into buildable specs, cross-functional leadership across engineering, QA, design, and compliance

Tools: Jira, Notion, Figma, GitHub, GA4, Claude, Codex, Cursor

EDUCATION & CREDENTIALS

Anthropic: Claude Code 101, AI Fluency, Agent Skills, Subagents 2026

Product School: Launches, Roadmap, Prioritization, Strategy, Discovery, AI Certificate 2025

Coderschool: Full Stack Software Developer 2019

HCM University of Education: BA, English 2014
