

Tien Nguyen

Product Manager | Payments, consumer products, and applied AI

Ho Chi Minh City · tiennguyentthao@gmail.com · +84 963 351 586 · linkedin.com/in/tiennguyenthithao · tiennguyentf.github.io

Summary

Product manager and technical product owner with seven years across fintech, payments, insurance, consumer products, and enterprise operations. At Colonial Surety, I led a PCI payment gateway cutover across three live platforms. At Olmo, changes to mobile booking and payment flows raised bookings 30%. At Green SM, I own requirements for agentic operations, including ReAct agents, orchestration, and human approval before execution.

Experience

Green SM - Technical Product Owner, Agent Orchestration & Harness Engineering

Agentic Ops Platform · Applied AI · Full-time · Jul 2026–Present

- Own product for an enterprise Agentic Ops Platform: advisory-first control plane that observes fleet signals, detects anomalies, recommends actions, and executes only after policy checks and human approval.
- Specify shared AI services and agent patterns, including a model gateway with fail-closed data classification, RAG and embeddings, ReAct agents, multi-agent orchestration, knowledge-graph tools, and auditable decision logs.
- Define agent release and ops loops: agentic SDLC with gated remediation, simulation/replay before policy or model changes, and an ops console for exceptions, capacity, and decision history.

Colonial Surety Company - Product Engineering

B2B fintech, insurance, payments · Contract · Feb 2026–Jul 2026

- Traced requirements to source transcripts and required sign-off on changes in a regulated US insurer.
- Led an emergency PCI payment cutover from Transax to CardPointe across three live platforms after the primary gateway shut down.
- Designed seven insurance products in one flow (knockout rules, shared claims, partial-failure cases). Wrote the B2B SSO BRD for two user types and partner sessions.

Hoochie - Product Manager

Web3 and fintech · Full-time · Vietnam · 2023–2026

- Led requirements for a US payments network targeting 400 ms cross-chain settlement, including a non-custodial wallet with KYC/AML and fiat-to-crypto bridging.
- Owned roadmap, backlog, and Scrum for an autonomous on-chain prediction-market fund. A two-month backtest returned 137% (\$10K to \$23.7K) with model scoring before release.
- Shipped aVault and aLink (USDC strategies, token-gated mispricing terminal, Telegram toolkit). Built the fund loop: score edge, cap risk, paper-trade, then settle scores.

Olmo Technology - Product Owner

Social e-commerce · Full-time · 2022–2023

- Raised bookings 30% by reworking mobile booking and cutting payment time. Shipped livestream gifting and live-booking.
- Led a 12-person Scrum team that launched a livestream app in 6 months and an e-commerce platform in 4 months. Personas, backlog, and stories raised sprint delivery speed 20%.

4/10 Fire Protection Trading Service - Associate Product Manager

ERP · Full-time · 2019–2022

- Built front-end ERP modules for 6 months, then moved from full-stack engineering into BA and Associate Product Manager ownership of resource management and quality control.

Skills

AI systems: RAG, ReAct agents, multi-agent orchestration, persistent memory, runtime controls

Governance: human-in-the-loop, evaluation thresholds, evidence checks, decision logs

Product: roadmap, backlog, Scrum, BRD, SRS, PRD, acceptance checks, stakeholder workshops

Domains: B2B fintech, insurance, payments, enterprise operations

Delivery: pilots, integrations, production rollout, PCI cutovers

Projects

Gelato. Agent-tool framework for company operations: orchestration, gates, decision logs. In progress.

Knowledge Engine. Meeting notes to sourced wiki; conflict flags; graded specs; human sign-off before engineering.

Recon. Daily research sweeps scored for relevance, credibility, and predictive weight.

Education

Anthropic Claude Code and Agent Skills - 2026

Product School AI Product Certification - 2025

CoderSchool Full Stack Developer - 2019

HCMC University of Education, BA English - 2014
